

Visendo Fax Server TIFF IFilter

TIFF IFilter enables searching for TIFF documents based on text content. When loaded, TIFF IFilter performs optical character recognition (OCR) processing of TIFF images, and then it provides the recognized text to the caller to build the search index.

TIFF IFilter focuses on text-based documents, which means that searching will be more successful for documents that contain clearly identifiable text (for example, black text on a white background), and less successful for documents that contain mixed content (for example, artistic text or text inside of pictures). Additionally, low-quality images and mixed languages can negatively impact OCR processing, and consequently, lower the quality of the search results.

TIFF IFilter supports all TIFF documents that are compliant with Adobe TIFF Revision 6.0 specifications, and it includes the most frequent compressions (such as LZW, JPG, CCITT v4, CCITT v6, and uncompressed).

How it works

Why use TIFF iFilter?

- Add full-text search and retrieval of image documents alongside Microsoft® Office and other electronic documents
- Search images along with electronic documents to speed up e-discovery tasks and find more business-critical information

IFilter Features

- ✓ With the TIFF iFilter, you can include TIFF images as part of your full-text search query in Microsoft® Office SharePoint® Server 2007, Microsoft Search Server 2008 Express and Microsoft Search Server 2008. The TIFF iFilter uses 's world-class, full-text OCR technology to make it easier to find the information you need in a single search query.
- ✓ The TIFF iFilter uses the powerful OCR engine to crawl SharePoint Server 2007 document libraries, sources outside of MOSS, lists and shared folders, and to extract the full text from image files and send the results to Microsoft's indexing engine. Once indexed, the images can be searched using full-text queries through SharePoint Server 2007, Search Server Express or Search Server 2008.
- ✓ Text recognition accuracy is enhanced by pre-OCR image cleanup features that improve search results by increasing the index accuracy on poor- or low-quality images.

About Visendo

Visendo is an **Independent Software Vendor (ISV)** specialized in **internet systems integration** on Microsoft technologies. Visendo was one of the first three Microsoft gold partners in e-commerce on the German market which is the highest level for a Microsoft partner.
