

Installing, maintaining and integrating your fax server with various document management systems that your organization needs is, usually, a headache for most IT departments. Tracking allocating and optimizing direct and indirect costs related to faxing is a tough challenge for companies given the today's complex business environment.

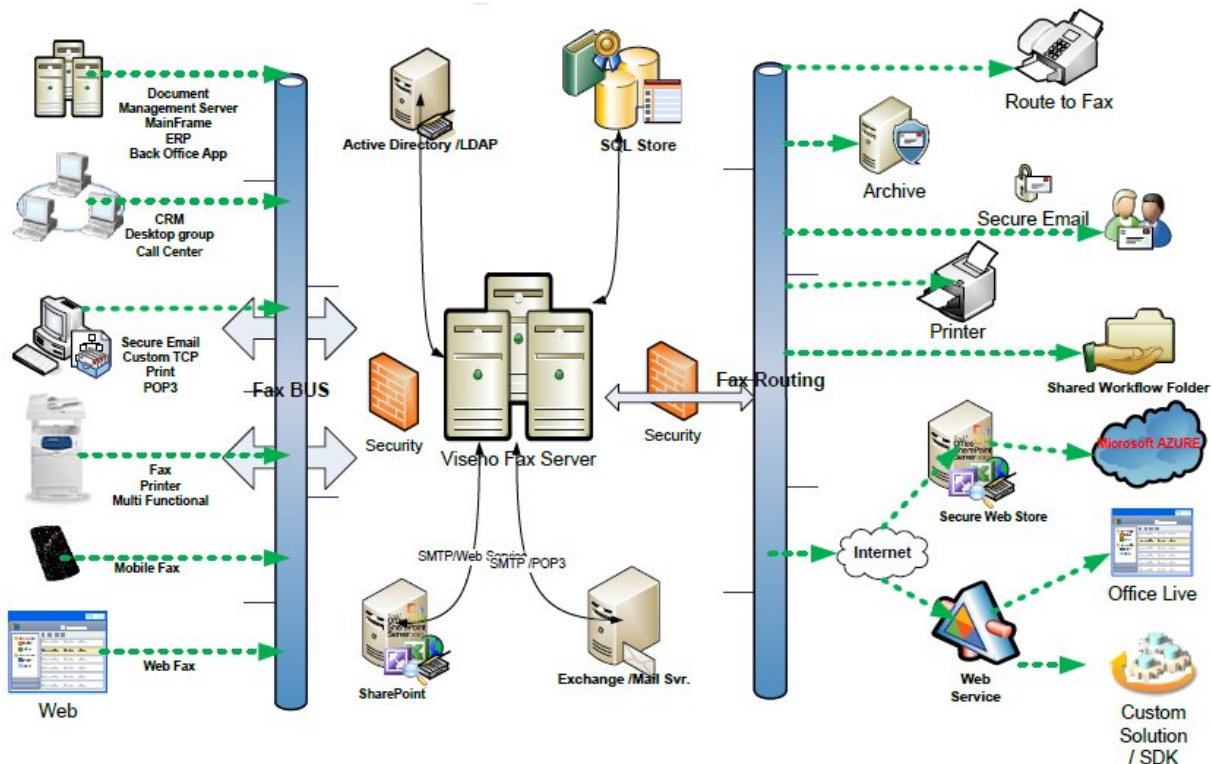

Visendo Faxing Solutions have been developed to both optimize investments and usability.

The Exchange fax connector of Visendo Fax Server gives users a software-based solution that can be run virtually or can be embedded on IP Private Branch Exchange (PBX) systems or media servers. The users will have inbound fax capabilities integrated with Exchange Server 2010 Unified Messaging. Hence:

- ✔ You will realize all the tight integration with your back office, messaging systems and MFPs: MS SharePoint, Exchange 2010 UM, Outlook 2010, Linux, Oracle
- ✔ You will be able to fully control your media gateways configurations
- ✔ Once you have your infrastructure ready, you will be able to install, configure and use Visendo Fax Server in less than 5 minutes
- ✔ You will then use minimum resources (paper, man hour, software resources, server allocation)
- ✔ It ensures HIPAA and regulations compliance
- ✔ Our support is usually faster than the installation and configuration time

Visendo Fax Solution Architecture: system integration

How Visendo Fax Server works with Exchange 2010

Outbound Faxes

With **Visendo Connector for Microsoft Exchange**, users create fax messages directly in Outlook as they would create emails. Faxes can be addressed to one or more destinations automatically importing the Outlook Contacts folder, or addressed manually using a simple dialog box.

Inbound Faxes

Visendo Connector for Microsoft Exchange automatically routes incoming faxes to the Outlook mailbox. Custom icons allow users to easily identify fax messages in their mailboxes. The fax image itself is saved in the user's mail message as a file attachment.

Features

- Powerful and Versatile Fax Engine
- Fax Over IP configurations
- Media Gateways integrations
- Advanced Fax Routing
- Automatic Back-up
- ➔ **Integrations:** SharePoint 2010, Exchange 2010, Active Directory
- POP3 recall
- SMTP Log authentication
- SOA & SAAS
- Web interface

Benefits

- ➔ Minimizing resources: paper, man-hour, hardware, software
- Cost optimizations
- Environment support
- Full flexibility in fax document management: document tagging, document archiving. Document sharing, document search
- Fast and easy application deployment
- HIPAA and Regulations Compliance

About Visendo
