## Who is Visendo?

We are an **Internet Systems Integrator** specialized in Microsoft technologies. We have always been one of the top 3 companies on the markets we entered. We were one of the first three Microsoft gold partners in e-commerce on the German market: this is the highest level for a Microsoft partner. Hence, you, as a potential customer, have this guarantee of our top quality for your projects.

## What is popConnect?

**Visendo popConnect 10** is a POP3/IMAP-Connector for your mail server when receiving your e-mail. It retrieves incoming e-mails from your POP3/IMAP-Accounts on the Internet and transmits them to the correct recipient.

## How can popConnect 10 help you and what makes us different?

- **Years of experience**  
**Visendo popConnect 10** is the latest version of the popular **popConnect series**, which has proven itself in years of extensive usage. It is a mature product, developed by specialists working for years in the field of e-Communications
- **Free Support**  
Secure and Hassle-Free E-mail traffic is critical to any business process. If yours does not work like planned, you can count on us to help you. Just give us a phone or send us an email. PopConnect but also generates detailed log files that can be used by our support team. Thus, the cause of your problems can be quickly found and fixed.
- **Individual or multiple accounts**  
You can set up pop3 account mailboxes for individual users, or send all mail for a particular domain in one account.
- **Support for multiple SMTP Servers**  
A new feature in **popConnect 10** is the support for multiple SMTP servers. This allows you to organize your e-mail communication even more flexible.
- **Database support**  
Keep track of your e-mail messages by using the search capabilities of a database.
- Can be used as a service in a **Server Core installation**
- **Extensions through Plugins** are possible  
Through the integration of **external plug-ins**, the functionality of **popConnect 10** can be further expanded. For example, you can integrate a virus scanner to protect your network.
- Collection of **RSS-Feeds**
- Receiving messages from different mailing lists
